The National Party has been largely unsupported by Philip Morris to date (certainly in recent times and with respect to monetary contributions).

I believe the National Party is generally supportive of the policies and strategies employed by this Company and plays a major role in ensuring the major parties adhere to their published policies.

The proposed contributions to the Labor and Liberal Parties (both at a State and National level) are consistent with contributions made by similar corporations in Australia to these parties.

The parties are generally supportive of freedom of expression and are open to reasonable and responsible communications on issues concerning our business.

If you agree with the above proposal would you please sign the attached and return it to me immediately. I will then seek the necessary approvals from New York.
